

The State of the Tucson Food System Report

*Assessing the Impacts of the COVID-19
Pandemic on Southern Arizona
2020-2021*

Dr. Gigi Owen, Climate Assessment for the Southwest
Eden Kinkaid, School of Geography, Development, and Environment
Dr. Laurel Bellante, Center for Regional Food Studies
Sean Maccabe, School of Landscape Architecture and Planning

Land Acknowledgement

The research in this report occurred on the lands of the Pascua Yaqui and Tohono O'odham peoples, whose relationship with this land continues to this day. Some of the oldest known agricultural practices in the United States have roots in the Tucson basin and southern Arizona. The people, culture, and history of this region allow us to live, build community, and grow food on this land today. We acknowledge our individual and collective responsibility to address the ongoing legacies of dispossession and exclusion in the region and aim to cultivate a more just present and future.
