

Hello, we understand that there is no set curriculum used within the classrooms. We did some research and found websites that include any agricultural topic, for any age group you are looking for. This can be used by your group and teachers for any presentations. It is our goal to make your curriculum as intentional as possible!

Here are some organizations to explore to find more curriculum on agriculture topics in the classroom: Arizona Farm Bureau, National Agriculture in the Classroom, or Learn About Ag - California Foundation for Agriculture in the Classroom.

Use this link to search any specific topic for any specific grade level, with any desired amount of time: <https://learnaboutag.org/matrix/> or <https://agclassroom.org/matrix/>

Here are specific one's about general farming, that can be catered to tomatoes:

<https://learnaboutag.org/matrix/lesson/702/>

<https://agclassroom.org/matrix/lesson/307/>

Want to check out supplies from Arizona Farm Bureau, for a no-cost, all inclusive lesson?

Reach out to Katie Aikins, 480-635-3608 or aitc@azfb.org to pick up a box.

The Arizona Farm Bureau Ag in the Classroom Program offers Curriculum Kits to teachers FREE of charge. You can check out kits for 2 weeks and teach the lessons yourself or have a volunteer come and teach a specific lesson from the kit to your class in a 1-hour presentation. Curriculum Kits are all-inclusive and provide teachers with math, science, social studies and English Language Arts lessons. Also included are the materials needed to complete each lesson. All lessons are aligned to the Arizona College and Career Readiness Standards (ACCRS). Lessons included with the kits are a compilation of AZFB lessons and lessons used by AITC Programs across the Country.
