Above is the [Google Drive folder](#) I've been working on this semester for Productive Patches! Specifically, it links to the section highlighting some of the main native desert species we use in our designs :)

Explore the following:

- **Picture Plant Directory:** A slideshow featuring two images of each highlighted plant — all common Tucson species or included in our designs.
- **Written Plant Directory:** A document listing the common and scientific names, along with identifying factors and other notes.
- **Plant Photos, MAIN SECTION:** A collection of all the photos I've taken of these plants over the past school year <3
